

MIDAS # 5470

WHITES POND

PALMYRA TWP., SOMERSET CO., MAINE

AREA 149 ACRES

TENTHS of MILE

WHITES POND

Palmyra Twp., Somerset Co.
U.S.G.S. Newport, Me. (7.5')

Fishes

Smallmouth bass	White sucker
White perch	Hornpout (bullhead)
Yellow perch	Pumpkinseed sunfish
Chain pickerel	American eel
Minnnows	
Golden shiner	

Physical Characteristics

Area - 149 acres

Maximum depth - 14 feet

Temperatures:

Surface - 77°F

13 feet - 71°F

Principal fisheries: Smallmouth bass, white perch, chain pickerel

Whites Pond must be managed for warmwater species because the pond contains no coldwater fish habitat. Fortunately, an excellent smallmouth bass fishery is maintained by natural reproduction. Fishing for white perch and pickerel can also be very productive at times.

Anglers have the opportunity to extend their fishing seasons at Whites Pond. The pond is open as soon as the ice forms in the winter and the summer season extends through November.

A boat landing is located on the south shore in the town of Palmyra.

Surveyed - August 1960
